1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Maurice Klee (30,399) on August 9, 2004.

The application has been amended as follows:

In claim 1, at line 7, after "the photoresist", please insert - - of less than the transverse size of any of the microlenses being formed - -.

In claim 30, at line 7, after "the photoresist", please insert - - of less than the transverse size of any of the microlenses being formed - -.

In claim 34, at line 7, after "the photoresist", please insert - - of less than the transverse size of any of the microlenses being formed - -.

In claim 38 at line 7, after "the photoresist", please insert - - of less than the transverse size of any of the microlenses being formed - -.

2. The following is an examiner's statement of reasons for allowance: The declaration evidence is convincing that both sharper features between the microlenses and most surprisingly increased smoothness in the resulting microlens surfaces due to the use of the larger laser beam and the formation of concave microlens profiles in the positive photoresist. There is motivation to form the lens with a tool (mechanical or shaped beam), which duplicates the profile of the desired microlens, but there is no motivation to use larger beams, which are less than the size of the feature produced as recited in the claims. The examiner notes that the applicant has a basis

for the language describing the relative sizes of the beam and the transverse dimension of the lens in figures 3 and 5B of the instant application and also through reference to copending application 60/222,033.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
